

Scenarios

Jordan

Sophia opens the Community Marketplace website and logs in to her account. She clicks on her profile and scrolls down to orders. There is a small red dot on the corner of the orders tab, telling her that a request has been made for some art. She clicks on the orders tab and opens up the list of placed orders. Right at the top of the list an order is highlighted, meaning she hasn't read it yet. Sophia clicks on the order and reads through it. There is a document containing the details of the requested art, as well as some contact information, so she can reach out to the buyer to negotiate price.

Quinn

Sam Howard opens the Community Marketplace website and logs in. She clicks on her profile in the upper right hand corner which has a small red one on the button. She is taken to her profile page. There is a small red one on her messages button to the left of the screen. She clicks on it and is taken to her messages page where she can see past orders (sorted by date) as well as the new order at the top of the screen. She can click on the new order message and read the details such as the patron's name, what they ordered and how much they ordered. There is also a contact button so she can message the patron when she is done with the order.

Spencer- Posting a new item for sale

Holly opens the Community Marketplace website and logs in on the login page. She clicks on her profile from the home page to open her profile page. There's a plus button to add an item she intends to sell. A pop up window has a place to put in all the details for the item to be sold. There is a place to upload a picture, a description and an expected price. Once Holly has all the details of the item she wants to sell she hits the publish button to publish it to her profile. From her profile page she can look at her items she has for sale. Holly can even sort her items by a variety of categories.

Holly opens up the Community Marketplace website for her school to look for new clothes to buy. She logs in on the login page, and scrolls through her main feed on the home page. She doesn't see anything that catches her eye so she decides to search for a specific item. In the search bar at the top of the webpage she types in "skirt". The feed changed to show people selling skirts ordered from newest posts to oldest. She finds one she likes and clicks on the post. This takes her to the page of the item for sale with its details and a price range the seller was thinking. From there, she can message the seller directly and ask to meet up and discuss the sale further.

Elias

Eric opens the community market place website. He clicks on his profile page and then on his messages page, and sees past orders. This way he can tell which clothing items are selling the best, and which new designs would be best to add to his page. He notices that most of the recently purchased items were crewnecks, so he decides it would be best to put his newest design on a crewneck. Once he has completed his design, and has pictures, he is able to add it to his page. He clicks on the plus button, enters all the information about the new crewneck he is selling, and publishes it to his site.
